5. (AMENDED) A method of ablating and/or coagulating tissue, comprising
the steps of:

- (a) providing an ablation device including an expandable electrode
array carried by an elongate tubular member and a pair of elongate flexures
wherein each flexure includes at least one opening, the electrode array including a
fluid permeable elastic member having insulating regions and conductive regions
thereon;
- (b) positioning the electrode array in contact with tissue to be ablated
and moving the array to an expanded condition by expanding the flexures;
